• **Dimensions and technical data for VISULEX Cameras K55-HD-Ex and K55-4K-Ex:**

• **Mounting:**

Similar to the internationally renowned Lumistar luminaires, the camera is secured to the cover flange of a circular sight glass fitting (to DIN 28120 or similar) using the hinged bracket included in the scope of supply (hinged bracket 1.4301). Alternatively, the special camera head can be mounted by way of a flanged adapter.

• **Illumination:**

- If there is not sufficient natural light in the vessel, an appropriately dimensioned Lumistar luminaire can be additionally installed.
- A separate arrangement consisting of light glass and camera glass is a further option for consideration. This combination depends on the process and the reactor size as well as on the surface of the vessel, the medium in question, and the angle of incidence.
- Consistently uniform illumination should be ensured.
